Dear Hiring Manager:

I am applying for the position of Director of Engineering & Shared Services at Puppet.

I have worked in software development for over 20 years. Over the course of my career, in addition to substantial hands-on development experience I have held positions with significant responsibilities for managing software engineers of various degrees of seniority as well as C-level executive roles in multiple organizations. As such, I have accrued a diverse skill set ranging from technical development skills in a variety of technologies, including most recently working on an Angular/Spring Boot full stack application deployed to K8S on Google and IBM Clouds, to more management and leadership focused competencies.

Having had the opportunity to be involved in or lead efforts in multiple disciplines, including product management, sales, marketing, customer support as well as almost 2 decades of experience managing engineers, has given me great insight into how all the pieces of the puzzle fit together and how best to align ongoing development objectives with the wider business goals.

My phone number is (310)-920-5027 and I look forward to meeting with you to discuss the details of this position in person.

Sincerely,

Will Beaumont
